

SERCO NIILO HL COLLECTING SWEEPER

High-quality and durable collecting sweeper!

- The collecting sweeper cleans surfaces and collects rubbish simultaneously.
- The brush has an integrated water tank with cup brush and roller nozzles for more efficient dust removal.
- The tank and brush follow the contours of the ground, and the device does not have to be separately raised or lowered even at speed bumps. The cup brush yields against walls and other obstacles it hits.
- The tank floor opens hydraulically, so it is easy to empty onto a pallet, for example.
- Oil flow requirement max.:
 - Niilo 205HL ja 305HL: 50 l / min
 - Niilo 650HL: 80 l / min
- Standard equipment:
 - Watertank, 100 - 200 l
 - The tank and brush make a vertical swimming movement
 - Right-hand cup brush
 - One stabiliser wheel in the front and two in the back
- An instant coupler and hydraulics for two hose pairs are included in the price

Follows the contours of the ground without the need to separately raise or lower it even at speed bumps.

Accessories

- SERCO Niilo cup brush left-hand

MODEL	Product number	Working width *	Brush diameter	Sand tank capacity	Water tank capacity	Weight	Recommended weight of base machine
